Notice to lot owners that own gate remotes to Timber Lakes

We are asking all owners that have remote gate openers to take a few minutes and stop by the Timber Lakes gate house or Timber Lakes office and give us the unique remote numbers from each of your remote(s). We will collect the codes for several months. Then we will erase all current codes in the system and add back only the codes we have been given by owners. **Those of you that have not given us your specific codes, will no longer have a working remote to open the Timber Lakes gate.** We can add your code anytime, but just remember, if you have not given us your unique code in advance, we cannot add it back into the system and your remote will not work.

If you do not want to stop at one of the two areas that can collect your code, you are welcome to email or fax it to us. Email to: office@timberlakesutah.com or fax to 435.785.8763. You will need to send us the following info:

Lot # ____ _

Owner of record Name: _____
(If the name does not match our owner of record information, we will NOT enter your code in the system).

FC # ____ (2 numbers)

Code # ____ _ (5 numbers)

Inside back cover

If the code has worn off the back of your remote, you can open the remote by removing the screw on top. The code is on the white tag attached to the inside back cover. Copy that number carefully and send it with the above requested information. Remember, **if you copy the code down wrong, it will not let you in the gate.**

We will collect the codes for about two months and then on November 1, 2010, we will erase all current remote numbers and only the number(s) you have supplied to us will be entered into the system.

If you have not supplied us with your code, your remote will not work after November 1, 2010.
