

Some Important Things You Should Know About Timber Lakes Estates

- We have posted speed limits in Timber Lakes. These are maximums, not minimums. Weather and road conditions often make it unsafe to drive at the posted level. Please slow down and be careful. Severe injuries and loss of life have occurred here by driving too fast for the conditions.
- If you are building, and your contractor or subs are caught speeding, they will not be allowed to drive into the subdivision. Please tell them you expect them to slow down and obey the rules.
- There is no parking along any road in Timber Lakes. If you park along the road, we will tow your vehicle.
- You may park on a first-come, first-served basis in the lot on the side of the TLPOA office. You may also park at Duck Lake. These spaces are not adequate for heavy use weekends or holidays. If there is no place to park, you will have to arrange to park somewhere else (that is legal) in Wasatch County.
- If you do park in the office parking lot, you need to get a parking pass from security at the gate.
- If you get stuck or have some kind of emergency where you park on the road, write your lot number and cabin phone on a paper visible on your dashboard. This allows us to contact you before we tow your vehicle. However, remember that we usually tow first and ask questions later. Our primary concern is safety and we must keep the roads clear of parked vehicles.
- We do not allow trailers to be pulled up or down on Blue Spruce during the winter. Every year, traffic is blocked and vehicles wreck because someone believes they can pull a trailer up (or down) Blue Spruce. Don't do it.
- Wasatch County prohibits short-term rentals in Timber Lakes. You cannot rent your cabin out unless it is a long-term rental (more than 30 days). We are cooperating with Wasatch County's efforts to prosecute owners who allow overnight rentals. If you are renting your cabin on an overnight basis, you are on the list of owners who will be prosecuted.
- Please clear the undergrowth and dead timber from your lot. You may not have an open fire or flame of any kind for any reason outside your cabin, even on your own property.

- Please do not tailgate through the gate behind someone else. You do not have to let the gate close all the way, but stop and use your remote opener to reverse the gate direction when another vehicle has passed ahead of you. Almost every month we spend money to repair the gate because someone tags along to run the entrance before the gate closes. Let's save our money for fixing the roads or some other good cause.
- When we have a security person in the gate house, your remote will not work. Slow down and identify yourself so they can let you in.
- If you are building, please be aware that we have to close the roads to heavy construction vehicles during the winter. This means that you cannot have materials delivered to your lot when the roads are closed to construction traffic. If temperate weather allows an exception to this policy, you must **obtain permission in advance** from the Vice President of Operations (the Road Guy). The Road Guy is a member of our board of directors and contact information is provided on our website.
- Our agreement with the Heber Valley Camp for snowmobile access through their property provides access only for Timber Lakes Owners and their accompanied guests. You cannot send your guests to snowmobile; you must take them with you. All snowmobiles inside Timber Lakes must exhibit a Timber Lakes snowmobile sticker. Only owners may purchase stickers. We do not allow snowmobiles without current stickers into the subdivision.
- If an owner is renting a snowmobile, the owner must purchase a Timber Lakes snowmobile sticker and show it in person at the gate in order to get the snowmobile into the subdivision. If you are renting multiple snowmobiles, you will need one sticker for each machine you want to bring past the gate.
- There is no ATV access from Timber Lakes to anywhere outside of Timber Lakes. ATVs may only be ridden on the roads in Timber Lakes. All other "trails" are actually trespassing on private property.
- From time to time, we may designate a place for owners to dump dead trees and brush. This site is for trees and brush only and not for construction trash or any other trash.
- Your Board of Directors is trying very hard to address the quality of life issues that affect every member of the TLPOA. We are all volunteers, doing our best. Thanks for being patient with us. We welcome and desire your input on issues. Contact us and we will try to help.
